

[illegible]

Question Description	Answer Choice 1	Answer Choice 2	Answer Choice 3	Answer Choice 4
Which technique	Greedy	Brute Force	Dynamic	Divide and
In the context of	Terminate	Optimize	Increase	Avoid stack
What is the time	$O(\log n)$	$O(n)$	$O(n^2)$	$O(\sqrt{n})$
Prime factorization	$O(\log n)$	$O(\sqrt{n})$	$O(n)$	$O(n \log n)$
Which algorithmic	Greedy	Divide and	Backtracking	Dynamic
Which method is	Dynamic	Brute Force	Greedy	Backtracking
What is the purpose	To find	To reduce space	To efficiently	To sort elements
Which problem	Greedy	Brute Force	Divide and	Backtracking
In the sliding window	Fixed size	Array split	Dynamic	Recursive call
The Subset Sum	Dynamic	Divide and	Randomized	Greedy
What is the key	Visits all edges	Visits all nodes	Visits no nodes	Visits some
What does the time	Number of	Square root of	Number of	Tree height
What is the worst-	$O(n \log n)$	$O(n)$	$O(n^2)$	$O(\log n)$
Which of these	Kruskal's	Dijkstra's	Dynamic	Prim's algorithm
In the context of	0	1	Undefined	Depends on
What technique	Divide and	Dynamic	Greedy	Backtracking
In the sliding window	Usually fixed or	Always fixed	Always variable	Always half the
What is the worst-case	$O(n)$	$O(n \log n)$	$O(k \log n)$	$O(n^2)$
Which statement is	Always optimal	Tries all possible	Always fastest	Uses recursion
Which problem is	Tower of Hanoi	Fractional	Matrix Chain	Longest
Which of these is a	Merge Sort	BFS	Linear Search	Backtracking
Dynamic	Greedy choice	Optimal	Recursion	Divide only
Sliding window	Finding	Sorting arrays	Path finding in	Binary search
The two pointer	Sorting arrays	Graph traversal	Searching pairs	Dynamic
What is the main	Always finds	Avoids re-	Is faster for all	Requires more
A Hamiltonian Path	All nodes once	All edges once	All nodes twice	A subgraph with
Sliding window	String matching	Game	Image	Sorting
Which algorithmic	Brute force	Backtracking	Dynamic	Randomized
Which data structure	Hash table	Trie	Stack	Queue
The recursive	Same input	Smaller	Larger instances	Random input
What is a main	Always misses	Consumes high	Needs a sorted	Only works for
Greedy algorithms	Future choices	Local optimum	Examining all	Using random
Which sorting	Insertion Sort	Bubble Sort	Merge Sort	Selection Sort
Dynamic	Only base cases	Overlapping	Recurrence	Independent
What is unique	Deterministic	Always fast	Uses	No use in sorting
Which is a major	Reduces space	Efficient for pair	Only works for	Automates
Which is a typical	Finding shortest	Sudoku solving	Maximum	Radix Sort
Subset sum problem	Brute force	Backtracking	Greedy	Tree search

Correct Answer Choice	Tags	Course Outcomes (COs)	Bloom's Taxonomy
3	Problem	CO1	L2 - Understanding
1	Iterative	CO1	L2 - Understanding
1	Practice	CO1	L2 - Understanding
2	Practice	CO1	L2 - Understanding
3	Backtrac	CO1	L2 - Understanding
1	Problem	CO1	L2 - Understanding
3	Two	CO1	L2 - Understanding
4	Problem	CO1	L2 - Understanding
1	Sliding	CO1	L2 - Understanding
1	Backtrac	CO1	L2 - Understanding
2	Backtrac	CO1	L2 - Understanding
2	Practice	CO1	L2 - Understanding
3	Problem	CO1	L2 - Understanding
3	Greedy	CO1	L2 - Understanding
2	Tree	CO1	L2 - Understanding
2	Dynamic	CO1	L2 - Understanding
1	Sliding	CO1	L2 - Understanding
1	Practice F	CO1	L2 - Understanding
	2 brute	CO1	L2 - Understanding
	2 greedy,	CO1	L2 - Understanding
	1 divide	CO1	L2 - Understanding
	2 dynamic	CO1	L2 - Understanding
	1 sliding	CO1	L2 - Understanding
	3 two	CO1	L2 - Understanding
	2 backtrac	CO1	L2 - Understanding
	1 graph	CO1	L2 - Understanding
	1 sliding	CO1	L2 - Understanding
	2 sudoku	CO1	L2 - Understanding
	2 word	CO1	L2 - Understanding
	2 recursion	CO1	L2 - Understanding
	2 brute	CO1	L2 - Understanding
	2 greedy,	CO1	L2 - Understanding
	3 sorting	CO1	L2 - Understanding
	2 dynamic	CO1	L2 - Understanding
	3 randomiz	CO1	L2 - Understanding
	2 two	CO1	L2 - Understanding
	2 backtrac	CO1	L2 - Understanding
	2 subset	CO1	L2 - Understanding
